## C l a i m s

1. A device for a receptacle mounting (1) for a urine container (12, 18), characterised in that the receptacle mounting (1) is provided with a support section (2, 4) and a base section (6), the position of the base section (6) relative to the support sections (2, 4) being arranged to prevent a urine bottle from falling out of the support sections (2, 4) when the receptacle mounting (1) is in its operative position.
2. A device according to claim 1, characterised in that the receptacle mounting (1) is provided with hooks (16) corresponding to recesses in a urine collecting bag (18).
3. A device according to one or more of the preceding claims, characterised in that the receptacle mounting (1), at its upper edge portion, is provided with a hook-resembling section (8) arranged to connect the receptacle mounting (1) to a bed, a bedside table or another suitable fixing device.
4. A device according to one or more of the preceding claims, characterised in that at least one of the support sections (2, 4) of the receptacle mounting (1) constitutes a hoop (4).
5. A device according to one or more of the preceding claims, characterised in that the receptacle mounting (1) is provided with a fold (10).
